

This pattern is designed to be with  $\frac{3}{4}$ " wood of your choice, although alternating maple and walnut layers give it good contrast. Cut out 6 layers of the rings and glue together. Cut a circle using the inner ring of the cup you are making so that it will fit inside the bottom of the cup to form a base. For more pictures of the completed project visit [scrollbench.blogspot.com](http://scrollbench.blogspot.com). If you complete this project, please email me pictures under the contact link on the website. Also there are more patterns on the website.

**Print 7**  
(6 for rings, 1 for base)
